

LBi Software Releases New Time & Attendance Tracking Application: At-Trac 4.0

LBi Software announces the next release of At-Trac

Woodbury, NY – January 23, 2012

LBi Software announced today the next release of [At-Trac](#), its Time & Attendance and Absence Management application – now available in the Cloud.

At-Trac is a complete web-enabled application that provides a comprehensive solution for entering and managing all of your attendance and time tracking needs. It has an easy to use intuitive drag and drop calendar interface and seamlessly integrates with your HR system of record, your billing system and payroll system.

At-Trac can now be delivered as Software as a Service (SaaS). Our SaaS option frees your IT staff from the burden of purchasing and maintaining expensive hardware and software. SaaS from LBi provides nightly backups, full firewall protection, 99.9% guaranteed uptime, a proven disaster recovery plan, and is offered with two options:

- Dedicated Server Environment
- Cloud Computing Environment

At-Trac's features include:

- E-mail notifications
- Full approval workflow - employee requesting days off/entering hours, managers monitoring and approval
- Business Intelligence Reporting
- TimeSheet entry and approval work flow
- Self-service data entry from anywhere there is an internet connection
- Paperless entry of "time off" requests (vacation, sick, personal) and approvals/rejections with automatic notifications generated to employee and manager
- The ability for employees to enter timesheets and "exception" times automatically, and managers to approve
- The ability to set up default schedules
- Daily, monthly and annual calendar views which allow managers to track accrued time off balances by individual or department, detect excessive absences or repeating patterns, and see time entered for employees
- Highly dynamic user interface allows end-users to enter company-specific time off and accrual rules, no need for programmer modifications
- Wide range of reporting capabilities, including absence tracking by individual/department and G/L liability
- Wireless handheld integration
- Biometric (Fingerprint ID) and bar code time entry clock options

About LBi Software
