Hosted Application Management Company, OneNeck, Partners with Datapipe to Add New Jersey Data Center

Datapipe Partnership Helps Meet Increasing Applications Hosting and Cloud Demands in the Eastern Region of the United States

SCOTTSDALE, Ariz., April 19, 2011- Hosted [application management](#) company, OneNeck IT Services, announced today their strategic partnership with Datapipe in order to add a world-class, highly secure, SAS 70 Type II certified facility in New Jersey to their solution portfolio. The partnership with Datapipe will enhance OneNeck's solution offering to customers based on the east coast, while adding to OneNeck's already robust disaster recovery offering to customers worldwide.

The addition of the New Jersey data center facility provides OneNeck customers with a state-of-the-art data center space to locate their business critical IT environments. The Datapipe facility offers industry leading specifications, redundancy, connectivity, cooling, green power, and security, which are critical elements of OneNeck's solution design. In addition to the significant cost and proximity advantage for OneNeck's east coast customers, all customers can utilize OneNeck's cloud offering through this facility as well.

"Our strategic partnership with Datapipe was designed to expand our offerings as we continue to experience increasing demand for our innovative hosted application management and managed hosting solutions," stated OneNeck CEO Chuck Vermillion. "Valuable partnerships are another key element that enables us to deploy market leading services and Datapipe's facilities exemplify the high standards we require in our solution offerings."

"We are proud to be partnered with a company like OneNeck, whose core values of operational excellence and customer commitment mirrors our own," said Datapipe Founder and CEO Robb Allen. "We are excited to support their organization's expansion efforts in the eastern U.S. Market."

In addition to the data center partnership, OneNeck rounds out its eastern presence by adding Rick Kanya as Regional Director. Kanya comes to OneNeck with 20 years of applications and managed services experience with an extensive background in both the Oracle and Microsoft communities. He has a proven track record developing successful sales strategies and innovative IT solutions for customers.

Vermillion commented, "Rick brings great depth and industry knowledge to the OneNeck Team. He has a keen sense of market trends that will enable us to deliver our services and capabilities in the eastern United States."

For more information on OneNeck's services and regional offerings or to schedule a visit to the New Jersey Data Center contact info@OneNeck.com.
